

# TUSHAR SHARMA

Kanpur, Uttar Pradesh

+91-9569539415 | tusharsharma2822@gmail.com | www.linkedin.com/in/tushar-sharma-7b2442228

## EDUCATION

Dr. A.P.J Abdul Kalam Technical University

Bachelor of Technology in Computer Science and Engineering (AI & ML)

November 2021 - present

Lucknow, Uttar Pradesh

## PROFESSIONAL EXPERIENCE

### WEB DEVELOPER INTERN

Oasis Infobyte

July 2023-August 2023

- Engineered user-friendly calculator and task management apps that seamlessly functioned on any device; **optimized loading speeds by 30%** through effective use of a mobile-first design strategy with **CSS media queries**.
- Implemented arithmetic functions in the calculator, achieving **100% accuracy** and ensuring button response times of under **100ms**.
- Developed a to-do list with comprehensive task management functionality (add, edit, delete, reorder) supporting **100 tasks** and **30-day data persistence** via local storage.
- Wrote modular, efficient code, reducing redundancy by **20%**, and ensured **100% cross-browser compatibility** through **50 tests** across Chrome, Firefox, Safari, and Edge.

## PROJECTS

### AUTOMATED BRAIN TUMOR DETECTION USING MRI IMAGES

May 2024 - present

- Built a deep learning model using Keras to classify **1,000+ MRI images**, attaining **90% accuracy** in tumor detection.
- Applied OpenCV preprocessing (resizing to **256x256 pixels** and normalization), improving training speed by **20%**.
- Designed a **5-layer CNN** with **2 fully connected layers**, fine-tuned over **50+ epochs**, boosting accuracy by **5%**.
- Regularized the model to minimize overfitting, maintaining validation loss within **2%** of training loss.

### AUTOMATIC HIGHLIGHT EXTRACTION IN CRICKET

September 2023- present

- Developed a system to extract match highlights from **3+ hours of footage**, generating concise clips within 5 minutes post-match.
- Conducted rigorous model training sessions utilizing enriched datasets comprising over **five hundred recorded match hours**; streamlined the identification process for pivotal cricket events leading to improved detection speed by reducing false positives.
- Leveraged cloud-based infrastructure to process data from 10+ matches simultaneously, supporting 50+ TB of video, **reducing processing time by 30%**.
- Preprocessed **video frames at 30 fps using OpenCV**, improving event detection **accuracy by 10%**.

## SKILLS

**Programming Languages:** C++, Java

**Web Technologies:** HTML, CSS, JavaScript, ReactJS, Express

**Databases:** SQL, MongoDB, Oracle

**Tools and Frameworks:** TensorFlow, PyTorch, Scikit-learn, Jupyter Notebook, APIs, Keras, OpenCV, System Design

**Course Works:** DBMS, Object Oriented Programming, Data Structures and Algorithms, Computer Networks, Operating Systems, Machine Learning, Artificial Intelligence, Software Engineering

**Soft Skills:** Analytical Brainstorming, Troubleshooting, Task Prioritization, Collaboration, Versatility, System Design Thinking

## CERTIFICATIONS

- Certification of Participation in QuickIQ challenge** – Unstop | [Link](#)
- Python (Basic) Certificate** - Hackerrank | [Link](#)
- Participation Certificate for Flipkart Grid** – Unstop | [Link](#)

## ACHIEVEMENTS

- Achieved 5-star rating as a C++ coder on Hackerrank and resolves over 200+ problems on Leetcode and Hackerrank.
